WESTGROUPE FYSH UK

"As mixed material frames are trending high this season, we have focused on using both metal and acetate in the majority of the collection. The combination of metals with animal print acetates and glitter acetates in deep earth tones is finished with muted gold and rose gold hues. Pearlized and multi-colored acetates give a new perspective to combination frames. Metal accents such as double metal bridges, inlays and brow line details are key. This season shapes range from round to square and modern cat eyes."

– Beverly Suliteanu, Vice President, Product Development, Westgroupe
