WestGroupe has launched its Fysh brand's autumn 2018 collection for women.

Vice president of product development, Beverly Suliteanu, said: "Combining the latest runway looks with the colour trends of the season, the new styles feature a vast array of bold colours and intricate detailing for a unique look."

Styles include 'F-3615,' which is a cat's eye frame with animal print on Mazzucchelli acetate that features a metal inlay along the browline.

The aviator-shaped 'F-3617' features a spring hinge, a honeycomb pressed pattern along the rim and the sides have a linear metal detail with a two-tone colour block effect. Colour options include burgundy ink, brown gold, rose black and purple teal.
