## Fysh – unique bold new frames

by *Maarten Weidema* 1 November 2018

Bold color combinations, unique patterns and exclusive design elements are part of the new **FYSH** releases for the Fall/Winter season. The clever mix of key fashion influences, hand made acetate and contemporary shapes creates feminine styles for the confident woman who embraces individual style.

Model F-3614

Style F-3614 features striking visual appeal of stripes that is inspired by art and fashion. The front and temples are color blocked in two high contrasting tones while a metal end cap, in a third accent color, intersects the temple for added contrast. A laser cut groove along the front's perimeter is highlighted in the accent color giving the impression of a thin pinstripe pattern, providing subtle pop of color. Available color options are red rose blue, brown blue rose, black grey violet and teal silver black.

Model F-3618

Beautiful fall shades light up style F-3618, an ultra thin monoblock front, accented with gradient coloration. Starting at the browline, ombre hues of deep rich burgundy blend into metallic gold giving off a radiant glow. Delicate temple embellishments highlighted in gold provide a subtle decorative touch. This style comes in ombre hues of brown gold, black gold, turquoise silver and burgundy gold.

Model F-3619

Stainless steel style F-3619 showcases an abstract pattern digitally printed on the front and the temples that provides depth and texture. A solid color line along the browline and the edges highlights the cat-eye shape of this semi-rimless frame that is available in rich hues of brown, sapphire, teal and grey.
