### WestGroupe's FYSH UK Adds New May Styles

Sophisticated patterns, glitter and translucent acetates are the focus for the summer FYSH UK collection from WestGroupe. The classic square shape of style F-3605 shows off a modern twist with a patterned, translucent acetate, featuring brushed gold metal temples wrapping the end pieces into a soft point.

Frame style F-3606 is designed as a modified cat eye shape. This metal frame is pierced with cut-offs along the front edges and features end pieces on the temples in a geometric mosaic pattern. The same pattern is reflected in the colorful printed browline.

The modified square shape with uplifting corners of style F-3607 shows off a glitter, ombré acetate. Laser cut down the browline and the bridge, this treatment mimics the unique double bridge effect highlighted in the FYSH

UK 2018 sunwear collection.
