## Spotlight on Fysh

WestGroupe introduces two new optical styles to its Fysh collection. Each optical frame features an artful design, feminine silhouettes and unique colorways. Style 3677 offers a CatEye shape constructed with Japanese acetate and metal temples. Small cutouts can be found on the frame front to highlight the style's unique shape. Inspired by watercolor tones and the ethereal tie-dye trend of the '70s, style 3676 features a rounded CatEye shape with subtle beveling along the top of the frame and a 3D temple design.
